Professional Summary

Computer Science undergraduate (currently in 3-2) with hands-on experience in quantum circuit simulation using Qiskit and exposure to applied problem solving through national-level quantum hackathons. Currently working as a System Tester Intern at an AI startup (Deep Infinity), gaining industry experience in testing and validating AI-based systems. Seeking entry-level roles or internships in quantum software and deep-tech startups.

Technical Skills

Quantum Computing: Basics of quantum computing, qubits and quantum gates, quantum circuits, quantum measurement, introductory noise models, variational quantum algorithms (academic exposure), NISQ concepts

Programming Languages: Python, JavaScript, Java, C, SQL

Libraries & Frameworks: Qiskit (circuit construction, simulation), NumPy, Pandas, Matplotlib

Web Development: HTML, CSS, JavaScript, React.js, Node.js, MongoDB (basic)

Tools & Platforms: IBM Quantum Platform, Qiskit Aer (simulator), Jupyter Notebook, Git, GitHub, VS Code

Mathematics: Linear algebra, probability and statistics (foundational)

Experience

Project Team Lead — AQVH Quantum Hackathon

Sep 2025 – Oct 2025

JNTUA College of Engineering, Anantapur

- Led a 4-member team in the All India Quantum Virtual Hackathon (AQVH), working on a quantum software-oriented problem statement
- Designed and implemented a prototype quantum job monitoring dashboard using Qiskit with a React and Django-based backend
- Integrated IBM Quantum APIs to visualize backend status and quantum job execution details
- Qualified for national-level finals among 100+ teams, demonstrating strong problem-solving and collaboration skills

System Tester Intern—Deep Infinity

Jun 2025 – Present

Internship (Remote)

- Performed functional, regression, and exploratory testing on AI-based radiology desktop and mobile applications
- Validated application workflows related to radiology reporting, data input, and output accuracy
- Identified and documented defects related to application behavior, edge cases, and performance issues
- Executed structured test cases and coordinated retesting to ensure issue resolution across releases

Full Stack Developer — Academic Project

May 2025 – Jul 2025

EduCycle Project, JNTUA

- Built a student-focused web application using the MERN stack

- Implemented user authentication and basic CRUD functionality
- Designed responsive user interfaces and integrated frontend with backend services

Projects

AQVH Hackathon — Quantum Job Tracker Dashboard

Sep 2025 – Jan 2026

- Built a web-based dashboard to visualize public quantum computing jobs using IBM Quantum APIs
- Displayed real-time job information including job ID, execution status, and backend quantum processor
- Visualized backend workload metrics such as queue lengths and device utilization to improve visibility of quantum job execution
- Converted raw IBM Quantum API metadata into user-friendly insights for students and developers
- Developed using Qiskit with a React frontend and Django backend as part of a national-level hackathon

AI Student Inquiry Chatbot

Mar 2024 – May 2024

- Built a chatbot to automate college admission inquiries using Dialogflow and Firebase
- Handled common student queries and reduced manual response effort
- Designed basic conversational flows for multiple user intents

Education

Bachelor of Technology in Computer Science & Engineering

JNTUA College of Engineering, Anantapur

2023 – 2027

CGPA: 8.7/10.0

Intermediate (MPC)

Sri Chaitanya Junior College, Pileru

2021 – 2023

98.4%

High School

Z.P.H.S Boys, Rompicherla

2016 – 2021

98.6%

Relevant Coursework

Core CS: Data Structures and Algorithms, Database Ware and mining, Operating Systems, Computer Networks, Machine Learning Fundamentals

Mathematics: Linear Algebra, Probability and Statistics

Quantum (Introductory): Introduction to Quantum Technologies and Applications

Certifications & Recognition

Introduction to Quantum Technologies & Applications — QClairvoyance Quantum Labs Pvt. Ltd (*Oct 2025*)

AQVH 2025 Quantum Hackathon Finalist — National-level competition (*Oct 2025*)

Introduction to Quantum Computing with Azure Quantum — Microsoft (*2025*)

Introduction to Prompt Engineering — IBM (*Jun 2024*)

EdX Verified Certificate: Models and Platforms – edX (*Jun 2024*)
